

# Pre-Registration in Practice

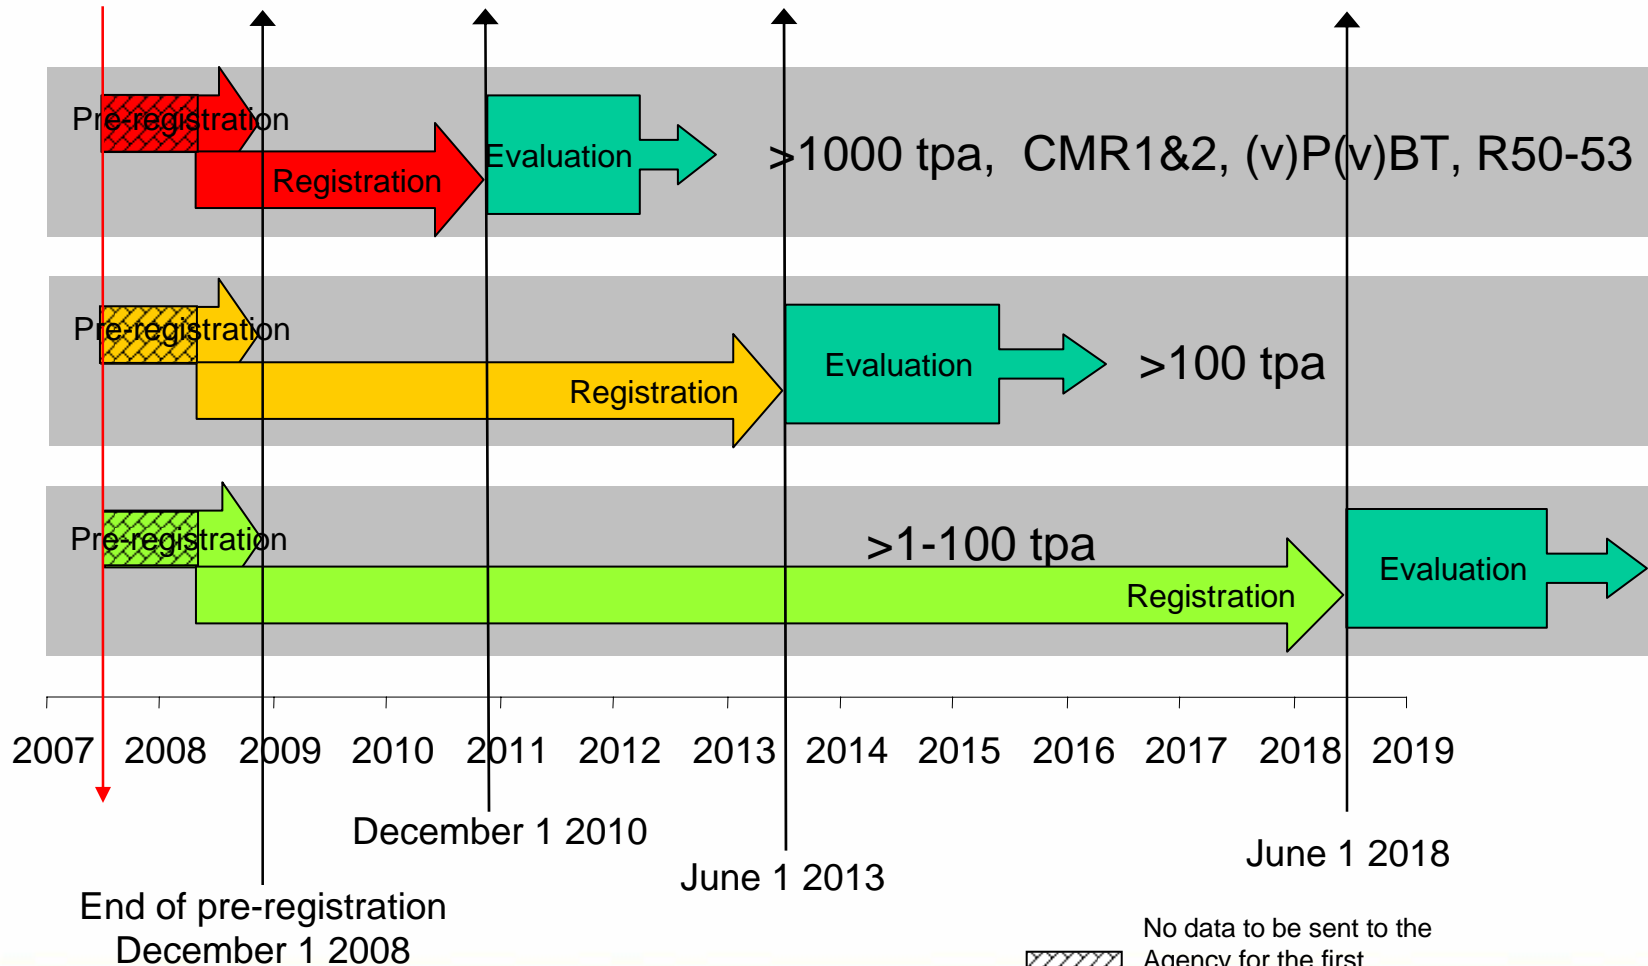

## The First Steps in REACH

Carol Mackie  
Compliance Services International

*“REACH in Practice” Conference  
1 June, 2007*

# Timetable for phase - in substances

Entry into  
Force  
June 1 2007

# Preparation for Pre-registration

## **Article 28, Duty To Pre-register For Phase In Substances**

List substances, preparations, intermediates in company activities

Break down preparations into substance components

Decide on Pre-registration substance list

Data review on each substance

Annual amounts produced/imported

Determine if you are a producer/importer/down stream user

# Pre-registration requirements

Name of substance and identity code(s) – EINECS, ELINCS, CAS

Name, address and contact person (third party representative if appropriate)

Envisaged deadline and tonnage band

Names substances or other identity codes for which information is relevant for Q(SAR) and grouping and read across

# Identity of substance

## **Guidance document RIP 3.10**

### Well defined substances

Mono constituent substances (>80%)

Multi constituent substances (10-80% mixture)

### UVCB substances

substances of Unknown or Variable  
composition, Complex reaction products or  
Biological materials

# UVCB substances

Biological sources are identified by the name of the species

Non biological sources are identified by the by the starting materials

Processes are identified by the type of chemical reaction e.g. extraction, fractioning, concentration or as a residue

# Pre-registration – do I have to?

**Only Manufacturers and importers can pre-register**

However if you are a downstream user it is important that the manufacturer and/or importer register all use areas of the substance

# Envisaged deadline and tonnage band

Tonnage band = volume of calender year of registration or average of 3 proceeding years

## Deadlines

> 1000 t/a, CMR 1 and 2, R 50-53	01 Dec 2010
>100 t/a	01 June 2012
> 1 t/a	01 June 2018

# Pre-registration file

**Eventually available from the Chemical Agency**

Web based

XML file

IUCLID 5

# Data required for pre-registration

**Name(s) in the IUPAC nomenclature or other international chemical name(s)**

**EINECS/ELINCS number if available and appropriate**

**CAS number if available**

**CAS name if available**

**Other identity code if available**

**Name of registrant**

**Address**

**Name of contact person**

**Name and address of the third party representative where appropriate**

**Envisaged deadline for registration**

**Substance(s) which you intend to use for read-across approach or (Q)SAR**

**Tonnage band**

<b>Data required for pre-registration</b>	
Name(s) in the IUPAC nomenclature or other international chemical name(s)	
EINECS/ELINCS number if available and appropriate	
CAS number if available	
CAS name if available	
Other identity code if available	
Name of registrant address	
Name of contact person	
Name and address of the third party representative where appropriate	
Envisaged deadline for registration	
Tonnage band	
Substance(s) which you intend to use for read-across approach or (Q)SAR
