Energy

From measuring the value of oil produced in the Arctic to litigating the extent of a utility's market power in the heartland of the country, energy clients frequently turn to Steptoe for their most demanding assignments.

Steptoe & Johnson LLP's long-established relationships with leading energy producers, transporters, and marketers have led to an extensive practice involving counseling, litigation, and representation of companies before the Federal Energy Regulatory Commission (FERC) and other federal and state agencies. Both our electric power and pipeline practices are recognized as among the foremost in the country.

We assist a broad base of clients within the energy sector, including electric power companies; oil pipelines; natural gas producers; hydroelectric and nuclear power plants; energy buyers, sellers, and marketers; and foreign governments.
