		mining and minerals processing capabilities; and (iii) the United States develops globally competitive, substantial, and resilient domestic commercial supply chain capabilities for critical minerals mining and processing.	
"All relevant agencies"	To "detail... the agency's strategy for using the legal authorities and appropriations identified... to meet the goals" of the EO. "The report shall explain how the agency's activities will be organized and how it proposes to coordinate relevant activities with other agencies." (Sec. 2)		<u>Within 60 days of EO issuance</u>
Director of the White House Office of Science and Technology Policy (OSTP)	To "describe... the current state of research and development activities undertaken by the Federal Government that relate to the mapping, extraction, processing, and use of minerals and that identifies future research and development needs and funding opportunities to strengthen domestic supply chains for minerals." (Sec. 2)	Report to be reviewed by the Director of the Office of Management and Budget, the Assistant to the President for National Security Affairs, the Assistant to the President for Economic Policy, and the Assistant to the President for Trade and Manufacturing Policy.	<u>Within 60 days of EO issuance</u>
Department of State, in consultation with USTR	To "detail... existing and planned efforts and policy options to: (i) reduce the vulnerability of the United States to the disruption of critical mineral supply chains through cooperation and coordination with partners and allies, including the private sector;	Report to be reviewed by the Assistant to the President for National Security Affairs, the Assistant to the President for Economic Policy, and the Assistant to the President for Trade and Manufacturing Policy.	<u>Within 45 days of EO issuance</u>

	(ii) build resilient critical mineral supply chains, including through initiatives to help allies build reliable critical mineral supply chains within their own territories; (iii) promote responsible minerals sourcing, labor, and business practices; and (iv) reduce the dependence of the United States on minerals produced using methods that do not adhere to responsible mining standards.” (Sec. 2)		
DOI, in consultation with the Department of Defense	Directed to “consider whether the authority delegated at section 306 of Executive Order 13603 of March 16, 2012 (National Defense Resources Preparedness) can be used to establish a program to provide grants to procure or install production equipment for the production and processing of critical minerals in the United States.” (Sec. 3)		<u>No deadline</u>
Department of Energy (DOE)	To “develop and publish guidance (and, as appropriate... revoke, revise, or replace prior guidance, including loan solicitations) clarifying the extent to which projects that support domestic supply chains for minerals are eligible for loan guarantees pursuant to Title XVII of the Energy Policy Act of 2005, and for funding awards and loans pursuant to the Advanced Technology Vehicles Manufacturing incentive program established by section 136 of the Energy Independence and Security Act”. (Sec. 4)		<u>Within 30 days of EO issuance</u>
DOE	“To review the Department of Energy’s regulations (including any preambles thereto) interpreting Title XVII and the ATVM statute, including the regulations published at 81 Fed. Reg. 90,699 and 73 Fed.	In addition to the report, “Within 90 days of the date of this order, the Secretary shall propose for notice and comment a rule or rules to
