Protocol quoted Pantelis Michalopoulos in an article titled "What Amy Coney Barrett on the Supreme Court Would Mean for the Future of Tech." The article, published September 25, discusses the effects of another Republican justice on the US Supreme Court on privacy, surveillance, antitrust, and net neutrality issues.

Michalopoulos says, "The implications for those issues — net neutrality, antitrust, cyber — are less clear-cut than in other areas because there are cross-currents that may pull a more conservative court in [a] different direction."
